

Dear Patients and Friends,

It is with great pleasure and excitement we announce the addition of the Doctor Supervised Contour Light Program in our office.

The Contour Light Program enables you to improve your health by taking inches off of those hard to hit places like your waistline, hips, thighs, arms and chin. The Contour Light Program treats all the areas of your body that are resistant to diet and exercise.

In fact, many Contour Light patients lose between 5 to 20 inches in less than a month!

Up until this technology arrived, if a person wanted to lose fat that quickly, their only choice was a strict diet combined with strenuous exercise, which is a time consuming, daunting task for most people and difficult to accomplish. The Contour Light Program offers simple nutritional suggestions and easy exercise options combined with a 30 minute, relaxing treatment that accelerates the fat burning capabilities within your body.

The Contour Light treatment is painless; patients can expect to feel a gentle warming sensation. Most patients will read or listen to music, and some will take a nap during the 30 minute session. The Contour Light treatment is safe for almost everyone (certain contraindications preclude some individuals from being treated) and there are no negative side effects. One of the best parts about the Contour Light Program is you can resume your normal activities immediately after the treatment because there is no recovery or downtime.

As you can tell, we are very excited about this breakthrough technology and would love to have the opportunity to tell you more about it. If you would like to improve your health and experience quick, but safe fat loss using our doctor supervised program, please contact the office to schedule a free, no obligation Contour Light consultation. If you would like to get started, mention this letter when making your appointment and receive a special discount.

We look forward to hearing from you soon.

Yours in Good Health – Naturally,
